TRUONG VAN TINH

AI Application Engineer

Python · FastAPI · RAG · LLM Integration · Evaluation

+84 931 467 024 | tinhkun102@gmail.com | Ho Chi Minh City, Vietnam | github.com/tvt987

PROFESSIONAL SUMMARY

Software engineer with 3+ years of experience, including .NET workflows at Con Cung. Builds Python and FastAPI applications for RAG document question-answering with citations and LLM-assisted ticket triage, with validated outputs, fallbacks and tests.

RAG	8 / 8	10	1,000
cited retrieval, abstention	eval queries resolved	FastAPI tests, CI green	review decisions validated

PROJECTS

Retail RAG Assistant PERSONAL PROJECT · Python, FastAPI, TF-IDF, SentenceTransformers, Docker — github.com/tvt987/retail-rag-assistant

- Built cited document retrieval with TF-IDF and cosine similarity over paragraph chunks, with optional SentenceTransformers embeddings.
- Developed FastAPI question, document and health endpoints with low-score abstention and extractive fallback when LLM calls fail; 8 evaluation queries gave 6 correct top-3 matches and 2 correct abstentions, CI green.

Support Ticket AI Triage PERSONAL PROJECT · Python, FastAPI, LLM Integration, SQLite, Docker — github.com/tvt987/support-ticket-ai-triage

- Automated LLM-assisted triage for 5 ticket categories with priority and sentiment validation, urgent-rule overrides and a rules fallback; token-protected human review, masked contact data and no raw ticket text in storage.
- Tested 10 FastAPI HTTP scenarios with mocked LLM responses and 120 schema combinations; verified SQLite persistence for 1,000 review decisions, GitHub Actions CI green on main.

Retail Reliability Lab AI-ASSISTED LAB · FastAPI, Redis, SQLite, Azure

- Redis cache-aside with a 60-second TTL, invalidation and outage fallback; 22 API and cache tests against real Redis; median SQLite lookup cut from 3.63 ms to 0.005 ms over 100,000 synthetic rows.

WORK EXPERIENCE

Full Stack Developer at **Con Cung** — Nov 2023 – Present

.NET · AngularJS · SQL Server · Dapper · Keycloak · ERP integration

- Delivered AngularJS and .NET voucher workflows, 7 subscription benefit calculations and a tool for 4 generated code-template types.
- Implemented Keycloak JWT / OAuth 2.0 / OIDC authentication and role-based authorization; supported Docker and IIS deployment and verified ERP API mappings.

Frontend Intern at **FPT** — Sep 2023 – Nov 2023

- Developed Angular / JavaScript components, integrated e-commerce REST APIs and corrected mobile UI defects.

SKILLS AND TECHNOLOGIES

AI applications	RAG, document retrieval, TF-IDF, semantic embeddings, LLM integration, prompt engineering, output validation, evaluation, abstention and fallbacks, human-in-the-loop workflows
Python & APIs	Python, FastAPI, REST APIs, SQLite, input validation, data pipelines
Backend & data	C#, .NET, ASP.NET Core, Dapper, SQL Server, PostgreSQL, Redis, database design, query optimization
Testing & DevOps	unit and integration testing, Docker, CI/CD, GitHub Actions, Git, logging, monitoring and observability, Azure, AWS, IIS
Additional	Keycloak, JWT, OAuth 2.0, OpenID Connect, RBAC, contact-data masking, Angular, AngularJS, TypeScript, RxJS, Claude, Cursor, GitHub Copilot, MCP, n8n, Agile/Scrum, code review

EDUCATION — **University of Information Technology (UIT), VNU-HCM** · Information Technology · Graduated 2026

LANGUAGES — **English** Conversational
