Truong Van Tinh

AI Application Engineer | Python & FastAPI
0931467024 | tinhkun102@gmail.com
Target location: Ho Chi Minh City, Vietnam | GitHub code repository: github.com/tvt987

Professional Summary

Software Engineer with 3+ years of development experience, including .NET retail workflows at Con Cung. Python/FastAPI portfolio projects demonstrate RAG document question-answering and ticket-triage automation with citations, validated outputs, fallbacks, automated tests and human review.

Projects

Retail RAG Assistant | Python, FastAPI, TF-IDF, Docker | Personal project

- **Built cited document** retrieval with TF-IDF/cosine similarity and paragraph chunks; supports optional SentenceTransformers embeddings.
- **Developed FastAPI question,** document and health endpoints with low-score abstention and extractive fallback when LLM calls fail.
- **Evaluated retrieval accuracy** on 8 synthetic queries across 2 documents: 6 correct top-3 matches and 2 correct abstentions; GitHub Actions CI passed.

Support Ticket AI Triage | Python, FastAPI, LLM Integration, SQLite, Docker | Personal project

- **Automated LLM-assisted triage** for 5 ticket categories with priority/sentiment validation and rules fallback; passed 5 synthetic fixtures.
- **Protected human-review endpoints** with a token, masked contact data and added urgent-rule overrides; excluded raw ticket text from storage.
- **Tested 10 FastAPI** HTTP scenarios with mocked LLM responses; GitHub Actions CI passed on main.
- **Validated 120 synthetic** schema combinations and 720 urgent-rule cases; verified SQLite persistence for 1,000 review decisions.

Retail Reliability Lab | FastAPI, Redis, SQLite, Azure | AI-assisted lab

- **Validated Redis cache-aside** with a 60-second TTL, invalidation and outage fallback; passed 22 local API/cache tests against real Redis.
- **Reduced local SQLite** median lookup from 3.63 to 0.005 ms (200 queries; 100,000 synthetic rows). Authored undeployed templates for Docker Compose and Azure.

Work Experience

Full Stack Developer | Con Cung

Nov 2023 – Present

- **Delivered AngularJS/.NET voucher** workflows, 7 subscription benefit calculations and a tool for 4 generated code-template types.
- **Implemented Keycloak JWT/OAuth** 2.0/OIDC authentication and role-based authorization; supported Docker/IIS deployment.
- **Resolved SQL Server/Dapper** retrieval defects and verified ERP API request/response mappings.

Frontend Intern | FPT

Sep 2023 – Nov 2023

- **Developed Angular/JavaScript components,** integrated e-commerce APIs and corrected mobile UI defects.

Skills and Technologies

AI Applications: RAG, Document Retrieval, Data Pipelines, NLP (text retrieval), TF-IDF, Semantic Embeddings, LLM Integration, Prompt Engineering, Evaluation, Human-in-the-loop Workflows
Python and APIs: Python, FastAPI, REST APIs, SQLite, Input Validation
Backend and Data: C#, .NET, ASP.NET Core, Dapper, SQL Server, PostgreSQL, Database Design, Query Optimization
Security: Keycloak, JWT, OAuth 2.0, OpenID Connect, RBAC
Testing and DevOps: Unit Testing, Integration Testing, Docker, CI/CD, GitHub Actions, Git (version control), Logging, Monitoring/Observability
Additional Infrastructure: Redis, Azure, AWS
Developer Tools: ChatGPT, Claude, Cursor, GitHub Copilot, MCP, n8n
Frontend: Angular, AngularJS, TypeScript, JavaScript, RxJS, React, HTML5, CSS3, Tailwind CSS
Practices: Agile/Scrum, Code Review, Communication, Problem Solving, Cross-team Collaboration, Technical Documentation

Education

University of Information Technology (UIT), VNU-HCM | Information Technology | Graduated 2026
